National Survey of Student Engagement: University of Calgary NSSE Retreat
September 23, 2015

Taylor Institute for Teaching and Learning

- To provide an interactive opportunity for sharing information about what you have learned about your faculty's NSSE data, your key areas of focus, and how you might move forward from this point.

Format

- Interactive Panel Discussion

- Introduce yourself at your table
  - Name, role
  - Faculty/school/department
  - Your interest here today

Haskayne School of Business

- What did you learn about your faculty or program from your NSSE data? How did you approach the analysis of these data? What questions or areas do you want to explore further?

UNIVERSITY OF
CALGARY

20-minute small group discussion

- In your small group, take some time to discuss what you have learned from Haskayne, and generate one question you would like to ask them or others in the room about what they have learned from the NSSE data?

Faculty of Science

- What are you doing to address the NSSE results and student engagement more generally? What is (are) your key area of focus? How did you figure out these were your key areas based on your data?

20 minute small group discussion

In your groups, provide 2-3 minutes for each person to share what they are doing now to address the NSSE results and student engagement more generally.

Cumming School of Medicine

- How are you moving forward? What are some concrete things that you have done to move from data to action? What is your action plan?

20-minute discussion

- In your groups generate as many ideas as you can regarding how you are (or might) move forward with your NSSE data.

Large group debrief

- What have you learned here today?
- What is one thing will you do as result of today's discussion?

Thank you!
